Have you ever been bored and thought about hacking someone? Have you ever wanted to hack someone and send them a virus without getting caught? Have you ever wanted revenge on that person who was always messing with your social standing? With Gmail Hacker Pro.exe, these questions can all be answered. Made by Troviagie Pty Ltd, this software is one of the best tools to use when it comes to hacking various email accounts from around the world for fun or any other purpose. It will also show you how many emails have been sent from the compromised account as well as allow you to take screenshots of what your target may be doing on their computer screen. To gain access to the account, you must gain your target's email password. Email hacks that are successful these days are very hard to track down, especially compared to hacks that were done with the old-fashioned ways. The email password is obtained by capturing the data sent during the logon process. The hacking software will utilize a variety of methods to capture this data, such as keylogging and sniffing. Once the password has been obtained, you will be able to send one or more viruses or Trojans to your target's email account!

The following people contributed to the development of Gmail Hacker Pro.exe:
