Acknowledgment and appreciation to the authors of all chapters in this book. iThenticate 5.2. Byline Author Last Name First. PINK-a-FAB, Virtual International Pediatric Association. Jul 7, 2019 Q: Can't read file in PHP, always get empty string instead of file content I am not a PHP dev, but I am not very experienced with Java either. I am trying to convert this Java example to PHP: In the java example, if you pass in file://C:/path/to/file/test.txt, it should read in test.txt

---

and return test. If I change the php example to use that exact value, it just reads in an empty string. PHP: Java:

```
import java.io.File; import java.io.FileInputStream;
import java.io.FileNotFoundException; import
java.io.IOException; import java.io.InputStream;
import java.io.InputStreamReader; import
java.io.UnsupportedEncodingException; import
java.util.ArrayList; import java.util.Arrays; import
java.util.List; import java.util.regex.Matcher; import
java.util.regex.Pattern
```
