Field of the Invention This invention relates to a control system for a vehicle and more particularly to a control system for a vehicle having an automatic transmission. 2. Discussion of Related Art Japanese Patent Provisional Publication No. 8-247575 discloses a conventional control system for a vehicle having an automatic transmission. In this control system, the engine is stopped when a gear-shift operation is performed. When the engine is stopped, a crankshaft of the engine is disconnected from a transmission from which driving force from the engine is output. The disconnection of the crankshaft from the transmission is referred to as "cranking." ba244e880a
