References Category:Reference works Category:Language dictionariesQ: How to find closest pixel to center of a specific radius in a circle? Is there a way to find the coordinates of closest pixel to the center of a circle with specific radius? for example: I want to find the coordinates of the pixels where the blue circle meets the red one. A: Start at (0,0), and search through the circle (distance of 0.2 units). If the distance from the center of the circle to the center of the pixel is less than or equal to the distance between the two circles, then that pixel is the center of the circle. (for $\text{int } x = -1; x \blacklozenge$ with her interjections into the discussion. A typical passage: "Well, no, no. You just have to have a strong business plan. That's all that is." So I've got a long way to go. It's not like every day is a party.
