Gmail now allows you to get apps to all your devices with the new Google Play for Work Google has announced the launch of Google Play for Work, a secure and user-friendly workspace for businesses to manage their apps and

---

policies. Business users can manage apps across all their devices, including Android, iOS, and other web browsers, with their own Google Play for Work account. To launch Google Play for Work, businesses just need to sign up and activate it on their first device. Since then they can manage their apps on all their devices, including Android, iOS, other web browsers. Google Play for Work users also get secure access to the whole Google Play store, to make it easy to find apps and stay up to date with the latest apps. It's free to use. Google Play for Work is the most secure way to access the whole Google Play store. After creating a user

---

account, they have to confirm their identity with 2-step verification using Google Authenticator. And their device password is protected with the Google Password Manager. Business users can manage apps in Google Play for Work on all their devices and access the whole Google Play store through a Google sign-in with their apps. Google Play for Work is built with enterprise in mind. Businesses can manage their apps through the Google Play for Work interface. They get a view of each app they have installed, with ratings, reviews, and app size, and a list of apps they've used. And they can search the whole store. Google Play for Work is

---

also secure. Business users get secure access to the Google Play store and to manage apps across all their devices. Google Play for Work is free for business users, with no fees or additional charges. And businesses can start with any number of users, including employees or contractors. A new report from Pew Research Center shows that in the U.S. today,
