Category:Pensacola metropolitan area1.12.2009 My Daily Craft I started this scarf in August in a class with Barbara Gaines. Today I hand stitched the ends to look like beads. I am working on Baby Charlie's afghan and I will be finishing it by the end of the month. Here is what I have accomplished so far. I will post pictures of the finished article in a week. I love the pattern I am using in the scarf. I love the colors of this rug, but it's so cold. .22.12.2009 .09.12.2009 I made this pillow for my parents for Christmas. I did a quick tutorial for the front. I attached the squares on muslin first and then the last one was done on linen. The back of the fabric is burlap. Since I have not been posting much lately, I am doing a quick post on the front, back and sides. I hope you can all make one for the house if you can't find one to buy. 1 comment: ABSOLUTELY ADORABLE! I made one for myself for Christmas as well. All those years ago I saw one of Barbara Gaines's pillows on a TV show and fell in love. I bought a large piece of her fabric and made a few of them. Back in the 80's I was a scrapbooker and I use many of my scraps to make quick and easy pillows for me. It's nice to see what you can do with fabric. I'm doing a similar pillow for my parents too.Problems among adults with serious mental illness: the use of the health care system. Despite the relative wealth of research in the area of mental health, there remains a paucity of information on the factors associated with the use of health care services by people with serious mental illness (SMI). The present study aimed to provide answers to some of these questions. This study examined the use of health care services by 623 people with SMI. The data came from the Personal Health Service (formerly known as Enthused). SMI is described by the Diagnostic and Statistical Manual of Mental Disorders (3rd edn [DSM-III-R]; American Psychiatric Association, 1987), and the Informant Version (DSM-III-R) was used to guide coding. The predictors of using health services were assessed by multivariate logistic regression. 3ef4e8ef8d
