If you have Photoshop installed on your computer, it might already be installed in the Adobe folder. Look for a folder titled Adobe Photoshop CS3 or something similar. After you've used the tutorials, you may decide to purchase Adobe's full Creative Suite, which has a \$900 price tag for the complete bundle. That way you don't have to buy the software separately. Photoshop Elements has been a good alternative for beginners that don't have a lot of money to spend on a new program

What's New in the Photoshop 2022 (Version 23.0.1)?

A rare hybrid found in a reef off the coast of Sicily has been named so the find could be raised back to the wild. The 1.4m (4ft) adult rough-tooth sawfish was caught while inspecting a 3.5m (11ft) deep rack of rocks at the bottom of the Mediterranean Sea, off the Goro Beach in Milazzo, a local newspaper reported. The creature, which belongs to the species *synagrosa clio*, is the first hybrid between a sawfish and a rough-tooth shark (the hybrid is believed to have been a female sawfish with a male rough-tooth shark), reported Italian news agency Ansa. The latter are known to be more vulnerable to human activities in the world's oceans, and the sawfish, which generally has a long snout with a saw on it, often attacks and kills smaller sharks. Captured using a video camera, the hybrid was found to be 5m (16ft) long, and weighing 50kg (110lb). It is not yet clear when the hybrid was born, but fish experts are hoping to reunite it with its sawfish relatives in the reefs of the Mediterranean. "It is important to try to recover some specimens. They would not be able to reproduce in captivity because it is not even known what their reproductive cycle is. We would like to put them back in the wild," said Massimiliano Cavalieri, a marine biologist at Milazzo university, according to the Associated Press. Fisheries officials said that caught the rare hybrid would be taken to a special facility belonging to the "Sawfish and Ray Initiative", which is run by the university, and then back into the open sea, Ansa reported. "This is a species that was once extinct in the Mediterranean but that is now re-emerging," said Cavalieri. "It is a very interesting case because the sawfish population in that part of the world has increased again, as is the case with two other species, the megalodon and the angel shark. The three have all come back to the Mediterranean Sea." A researcher caught a hybrid 'shark/sawfish' shark on the Japanese island of Misawa, near Wakasa Bay, in 2015 Sawfishes often attack humans.
