What's New In?

Everpix is a powerful cloud application that makes your photos available online. It allows you to store all your photographs (files and folders) in one central location and access them from any computer via a web browser. You can also share them with other users, by email, Facebook and Twitter. The user interface is highly intuitive and very easy to use. You can easily organize your photos by date, by folder, and even by kind (for example, birds, holidays, etc.) The application comes with a complete set of desktop and mobile clients, so you can view and organize your photographs whenever and wherever you want. Everpix also supports a new generation of browsers that is based on HTML5 and the web standard. In fact, Everpix is fully compatible with Google Chrome, Mozilla Firefox, Safari and Internet Explorer 11. Description: This Add-on allows you to navigate to specified websites, using the address bar as a web browser. If you select an internal URL, you will be taken to that page within the current page. With this Add-on, you will be able to view, bookmark, print and copy the selected site, but you can only specify internal addresses. Description: This Add-on allows you to navigate to specified websites, using the address bar as a web browser. If you select an internal URL, you will be taken to that page within the current page. With this Add-on, you will be able to

view, bookmark, print and copy the selected site, but you can only specify internal addresses. Description: Search Engine Optimization (SEO) is the best way to improve the visibility of your website in the Internet. The addition of SEO tags can improve the search engine results and your website will appear higher in the search results. This Add-on will automatically add SEO tags to all HTML pages in your website. It will also add or remove the SEO tags according to the appearance of the contents of the selected pages. Description: This Add-on allows you to edit the settings for the current web browser.
