No menus, no complicated graphical interface, just fast, simple and quick! This is my review of the Notes++ Serial Key program. You can get this on this site. Notes++ Review Features: Easy to Use, and as simple as can be, there is no complicated GUI or startup time. Fast, and very easy to use. No complicated menus to learn, and no complicated steps to do anything. Ease of use: Takes a bit of practice to figure out how to use the program, but once you learn it, it works great. Value: Not a program that you need

to get, but there is no reason not to get it if you need it. Summary: In a nutshell, the Notes++ software is just that, a program that takes notes, very simple. You don't need to use any advanced features or complicated menus to get it done. What's New In Notes ?

Notes++ is a tiny and portable software utility that enables you to quickly take notes in a text editor that actually resembles sticky notes. It comes packed with just a few options that can be easily modified by users, even the ones with no previous experience in word processing software. Portability advantages Since there is no setup pack involved, you can drop the executable file in any location on the hard disk and just click it to run. There is also the possibility to save Notes++ to a USB flash disk or similar

storage unit, in order to run it on any PC with minimum effort and no previous installers. An important aspect worth taking into account is that the Windows registry and Start menu do not get updated with new entries, so there are no traces left behind after the app's removal. Straightforward interface and options The GUI is represented by a small frame with a yellow background that can be moved anywhere on the screen. You can adjust its opacity, make it stay on top of other windows, as well as show it in the Windows taskbar. As far as the text is concerned, it is possible to change the font type, size and style, as well as to enable horizontal and vertical scrollbars. There are no other notable options

provided by this software program.
Evaluation and conclusion The app is
pretty light when it comes to system
resources, using low CPU and RAM.
There were no kind of issues throughout
our evaluation, as Notes++ did not hang,
crash or pop up error messages. Although
it does not integrate rich features,
Notes++ offers a simple solution to
quickly taking notes on the desktop, and it
can be used by anyone. + + === Notes++
