four security software that provides the security tools you need to keep your workstation and server safe from any unwanted intruder. It is compatible with various operating systems like Windows, Windows Server, Linux, UNIX, Unix, Mac OS X and VMware. This product is intended to protect your workstation and server against viruses, spam email, spyware, malicious web pages and hacker. With its easy-to-use interface, the suite includes four types of security tool: Scanner, Antivirus, Password Manager and Email security. Ultra Small Business (USB) Protection Suite consists of four separate software programs in one single package. Each of these four software programs includes a set of features to ensure your workstation and server is protected. These four components are: Scanner 's functionality includes the capability to scan the entire

system for the presence of any hidden files and folders, making sure that all the existing malicious files and folders are removed. The utility also provides you with the ability to remove malicious files and registry entries if any have been found during the scan. 's functionality includes the capability to scan the entire system for the presence of any hidden files and folders, making sure that all the existing malicious files and folders are removed. The utility also provides you with the ability to remove malicious files and registry entries if any have been found during the scan. Password Manager 's functionality includes the capability to store login information, securely and quickly. There are two password generators available to use with your current Windows and Linux OS. The utility is also capable of removing saved passwords if any other password of your choice has been

specified as the master password. 's functionality includes the capability to store login information, securely and quickly. There are two password generators available to use with your current Windows and Linux OS. The utility is also capable of removing saved passwords if any other password of your choice has been specified as the master password. Email Security The Email Security component helps you to manage all your email accounts and provides protection from various types of malicious email like viruses, spyware, Trojan horses, phishing, spam and malware. You will be able to create and schedule automatic response emails when a threat is detected

**System Requirements:**

# Memory: Memory type: DDR4 2133/1866( 2×4 GB Recommended ) Memory slot: Dual Channel Memory Frequency: DDR4 2400/2200/1800/1600 Memory size: 8GB/16GB Memory bus: 32bit Memory type: SODIMM Memory speed: DDR4- 2133 Memory cache: 8 Memory voltage: 1.35V Memory Interfaces: 2xDIMM Memory size: 8
