The purpose of this study was to examine the serotonergic system in 12 inbred mouse strains. Serotonin (5-hydroxytryptamine; 5-HT) was measured in three brain regions: dorsal raphe, cortex, and hippocampus. The strains ranged in 5-HT content from the lowest, DBA/2J, to the highest, C57BL/6J. The C57BL/6J strain showed a significant positive correlation between the 5-HT content of dorsal raphe and cortex. There was a significant strain by sex interaction for the dorsal raphe, indicating higher 5-HT in males. The results were discussed in terms of the influence of genotype and sex on serotonergic function in the brain. Comparison of 12-lead and non-12-lead electrocardiographic evaluation of patients with chronic coronary artery disease. Although 12-lead electrocardiographic (ECG) interpretation is recognized as the best single indicator of ischemic heart disease, it

A: Check the list of barcodes here: A: The UPC (Universal Product Code) is a 13-digit number. I used it a couple of years ago and the program I used (I think it was with webex) had a database of over 50K UPC barcodes for you to select from. If you go onto the UPC website they also have a list of available formats and their corresponding specifications. Q: How to find out whether array contains objects that are equal to each other? Let's say I have this code: var a = [1, 2, 2, 1]; var b = [1, 2, 2, 1]; var isEqual = a.indexOf(b) !== -1; It will return true for that. How to find out whether the array contains objects that are equal to each other? A: You can use Array.some() and Array.every() var a = [1, 2, 2, 1]; var b = [1, 2, 2, 1]; function isEqual(x, y) { return a.some(function(e) { return e === y; }); } console.log(isEqual(a, b)); console.log(isEqual([1, 2, 2, 1], [1, 2, 2, 1])); The application of the DRI solution to the activation of slag. The phosphoric acid solution and the DRI solution are compared and used for activation of slag. The solution with DRI has various advantages, such as a low cost and a high reactivity. To evaluate the activation of slag by DRI solution, chemical compositions of the reaction products were analyzed by X-ray fluorescence spectrometry, X-ray diffractometry, Fourier transform
