Once the installation is complete, it will show up in your Extensions page. Old Reddit Redirect Manifest: The manifest file is pretty simple. Let's look at what it does. "name": "Old Reddit Redirect", "version": "1.2.1", "manifest_version": 2, "description": "Redirects Reddit URLs to the old version, which is quite nice.", "options_ui": { "chrome_options_menu": { "page": "options.html", "open_new_window": true }, "chrome_arc": { "page": "options.html", "show_in_task_bar": true } }, "content_security_policy": "script-src' self' 'unsafe-inline' ", "background": { "persistent": true }, "browser_action": { "default_icon": { "16": "images/png/16.png", "32": "images/png/32.png", "48": "images/png/48.png", "128": "images/png/128.png" } }, "icons": { "16": "images/png/16.png", "32": "images/png/32.png", "48": "images/png/48.png", "128": "images/png/128.png" }, "default_popup": "images/png/popup_firefox.png", "permissions": ["tabs", "", ""] } } Note that the extension does not use any scripts or APIs to manipulate you. The extension simply redirects to the old site. Old Reddit Redirect in action: The most relevant information can be found in the screenshots below. As you can see, the extension works

Old Reddit Redirect Crack

This extension is really cool. You've probably already got it if you've been around for a long time, but for any older Reddit users this is the perfect extension, that keeps the old Reddit.com experience alive. It works for all the old subreddits, you won't have to make any efforts, just enjoy the old subreddit pages with the old interface. All the older URLs (np,amp, I, etc.) are redirected to the old, old Reddit.com. Old Reddit Redirect Screenshots: Old Reddit Redirect is a neat extension that takes you back to the old Reddit when you are browsing in the new design. The extension comes with lots of the most famous subreddits (np, amp, I, etc.) as well as the whole site. It is a perfect choice for old users who want to visit the old Reddit in the new interface. If you use Reddit for a daily basis, then getting rid of the new design will certainly be a positive choice. Not only do you have a more reliable interface, you can quickly navigate through the site and gain insights from it. What do you think? The Reddit Widget extension lets you quickly get to Reddit in your desktop browser, and it is easily the most popular subreddit on the platform. It has millions of users and more than 1 million pages, making it the biggest social community platform for users around the world. The extension is an essential tool for any Reddit user to use in his or her day to day life. You can easily get to the top sites and communities while on other sites like Twitter and Facebook. Apart from the usual Reddit links, you will get to enjoy new functions, such as the Reddit in a card option. It allows you to get to the Reddit quickly, without a complicated interface or loading problems. How does this widget extension work? It is the only extension that lets you get to the Reddit without a complex interface. That is because you will get to open a button that redirects you to the site with the Reddit home. Once the page is loaded, you can enjoy the content. How can I get the best out of the Reddit Widget extension? You will get to get the best out of the Reddit extension by doing a little bit of optimization. The first thing you must do is that you must get rid of the annoying and slow animation before the content loads. You 09e8f5149f

Old Reddit Redirect Crack + Activation Code

Old Reddit Redirect is the ultimate extension for Reddit. The design for reddit.com has been overhauled and its community has been split between the new and the old one. With that, you're going to have a great time browsing Reddit! The extension automatically redirects all the old reddit.com links, including amp.reddit.com, np.reddit.com, i.reddit.com and others to new.reddit.com. Yet, reddit.com itself is still accessible, as the whitelisted new.reddit.comdomain is not redirected.
