What's New in the?

We continue to evolve the Markup toolset for designers and workflows. We've added more ways to import images and better ways to show, keep track of, and edit those images while they're in your drawing.

We’ve also added a couple of new advanced layers, annotations, and a new text style. New Features Rapid Feedback from Paper While reviewing your designs with others, it’s often helpful to be able to send feedback back and forth— for example, to note a suggestion or ask for more details, or to point out a mistake. With AutoCAD, you can use the new Markup toolset to quickly import feedback or view shared content in a new way. In the Drawing window, select Markup | Import from Paper. Enter a filename for the file containing the paper feedback, and then

select a format. The paper is imported to the drawing. You can add comments and import content directly into your drawing. In the drawing, select Markup | Markup Assist. The paper is automatically zoomed to the area that's relevant to you and the designer who sent the paper. Feedback in the drawing is displayed at full scale so that you can see it clearly. Printed Paper as Annotations You can also import the paper feedback to an annotative drawing—it's like using annotations on a paper printout. In the Drawing window, select Markup | Markup Assist | Markup Settings. The

Annotative Markup Settings dialog box opens. On the Markup tab, select the Markup Type that you want to use. A grid is added to the drawing. Select a grid color. On the Annotation Tab, you can add an annotation. You can draw text directly on the drawing or type a freeform text box. You can select an image file or a folder that contains files to import. When you're done, you can delete or hide the annotations. Shared Content as Annotations With Markup, you can also share your changes directly on paper using Shared Content Annotations. Select

Markup | Markup Assist | Markup Settings. In the Markup Settings dialog box, on the Markup tab, select Shared Content. A grid is added to the drawing. You can select images, GIF files, or PDF files that you want to import. When you import an image
