What's new:

- **FIFA 22 brings a slew of fresh features and enhancements, including: "HyperMotion™ Technology," a new feature that uses data recorded from 22 real-life players and uses their movements from complete, high-intensity games within motion capture suits to help generate life-like, more realistic ball controls. This can be especially crucial in football matches, helping create new and unique ways of playing and creating excitement in the most-played game on earth.**
- **Online Connection Notifications includes an online connection reporting system that lets you see when your connection is lost and come back online with the only app to do it!**
- **A new and improved Accurate Free Kick and Penalty Kick system. To accurately simulate free kicks and penalties in play mode, we've added balancing algorithms to simulate the slight curve when kicking towards goal. Match Officials will also now cheer for their favorite team and opponent when they spot crucial moments in the action. The data we've collected over many years of football matches also helps to tell the difference between a good and bad penalty kick by checking the angle of the ball.**
- **The newest FIFA scooter is available and is now the most realistic version of its kind; you can now adjust its speed, power, stability and so much more. This new scooter also gives you new opportunities as you can earn championship medals for your favorite team by heading balls in the goal.**
- **Advanced AI simulation allows AI players to perform physically realistic actions. The new AI rewards players by challenging them to take difficult free kicks, and provides options for them to play creative, intricate football.**
- **The Impact Engine adds a feeling of speed and agility to a player's run as the player's contact with the ground is more realistically recreated using high-resolution mesh models.**
- **"Replay Assistant" gives you the ability to speed up or slow down a specific part of a match by taking it out of the normal forward motion of the game. The faster you play, the more realistic the game will feel.**
