If you have any question or issue, please contact us by email at: This application is similar to: Belkasoft Evidence Browser Enjoy our

What's New in the Belkasoft Evidence Reader?

===== Easily view and manipulate all of the cases' evidence files. With a single click, the app displays the selected evidence in the right side panel. You can view the evidence files in different ways, which includes Treeview and Tagbrowser, as well as images, colored regions and other data objects. For each evidence file, you can also view the comparison images and perform the case review, which includes cross-checks, dynamic of images and time line, dynamic of text, numeric and text fields, date, common point, etc. You can export the selected evidence data into different formats, which includes PDF, HTML, MPEG and RTF. You can even export the case file into iPad native format using the Export RTF function to save

the evidence file into your iPad. Belkasoft Evidence Reader License:
===== The Belkasoft
Evidence Reader is freeware for non-commercial use. Please read
more information regarding the Belkasoft Evidence Reader at
www.belkasoft.com Vertebral Pathologies, an application under
development for physicians of the spine - injuries and degenerative
conditions, is a new diagnostic tool that will help them to produce
dynamic diagnosis in a more accurate, objective, easy and fast way.
This application has been conceived for Drs. It aims to simulate
dynamic and static diagnostic of the spine, both in relation to the
diagnosis of vertebral pathologies. This tool will give the level of
biomechanical mobility of vertebrae, and will help prevent
osteoporosis, fractures, injuries and other pathologies. This
application is structured to help the diagnosis of spine injuries and
degenerative processes like osteoporosis, in particular, and the spine,
in general. It is developed to achieve the diagnosis by the more
traditional approaches: radiography, clinical examination and spinal
manipulation. The Vertebral Pathologies is a digital diagnostic
application, targeting on a larger audience than the Radiologists. It is
planned to use the platform with an interface for Smartphones and
tablets. It is also planned the version of Vertebral Pathologies for
Nurses, which should make it possible for them to have an immediate,
effective and complete management of patients presenting spine or
joint-related problems. This application is mainly targeted for health
professionals, academics, companies, individuals, researchers,
students and clinicians. The application is advertised on many
scientific and professional forums and websites, but it is not a
commercial product. The software will always be free to use
