The difference between eepsite and ueepsite: - eepsite (old) is based on eepsite template - support only one domain, so if you want to build your blog or website, you need to register a domain and purchase a hosting plan (see admin page), and you need to create more accounts to login to the members area - ueepsite is based on ueepsite template - support multi domains, so you just need to register domain names and create accounts without spending any money at all Start browsing and downloading music for free without an iTunes account! • Search for any song on the Web in an instant • Listen to all of your favorite music without having to pay a cent • Share playlists with your friends using email, Facebook and more! • Every song has direct links to the iTunes Store so you can buy it from there • No need to create a free iTunes account... Project: The aim of the project is to make an application, which helps to make website hierarchy. For example, you have 2 pages, which have 2 folders, but you don't know the final structure of the website. So you need to run an application, which creates the website structure (folder/folders/page) for you. The Application creates own hierarchy, but you can change that hierarchy and create your own hierarchy.
