Free![/url]Q: Do I need to uninstall my application from my
phone, when I change my application's target sdk version? I
am a bit confused, when i change my application target API in
my code, for example I change the target API from 10 to 11, do
I need to uninstall my application from my phone, or I can still
use my app as it is? Thank you! A: No you do not need to
uninstall your application. As of API 10, Google Play doesn't
provide the ability to specify which API you're targeting and it
still doesn't require an uninstall to be done when the system
updates. Google has also made it very easy for you to port
your app to the latest SDK version. # Copyright 1999-2020
