X-Canorus is an advanced, convenient software that lets you create music and draft lyrics with ease. You don't have to be a master at music notation - one click can do the job for you. X-Canorus combines intuitive editing with high performance, and with its one-click lyrics-writing mode, you can spend more time composing your songs instead of figuring out how to correctly add a capital letter here and there. Create songs X-Canorus offers a variety of versatile tools to create your melodies. In addition to the traditional notation, its staff editor lets you draw your music manually. Once you're done, you can immediately preview what you've written, and export the song as a MIDI file or as a PDF file for printing. Of course, once you've created a document in another format, you can turn it into a MIDI or PDF song by combining it with the song editor. Now let's talk about lyrics. For those whose passion is to write lyrics on paper, X-Canorus offers its one-click mode: just choose the text that you want to add, and its tool will print it out. Or, if you prefer to type your lyrics, you can directly type them into the lyrics area, and then add the desired effects, in a column of customizable colors, to create the right composition. Play and export X-Canorus features a 16-channel MIDI host that lets you play, record, and export your songs. Moreover, its toolset makes it easy to tweak the MIDI file if needed. I have been using X-Canorus for the last 3 years to compose music and include lyrics and orchestration for my music. I have never seen any application do it this well until I came across X-Canorus. I think that a big problem with music is that it can be so confusing to those of us that just "know" music. For instance, I rarely understand the complexities of the "music business". Like, who is the composer, who is the lyricist, who is the publisher, who is the recording company, etc. I can do all the technical side (pitches, chords, time signatures), but I am much at a disadvantage in understanding how to actually make and get paid for my music. This app was a GREAT help for me in my musical education. When I am composing, I don't have to worry about who owns which license, because X-Canorus can take care of that for b7e8fdf5c8
