Click the Eraser tool again to return the image to normal. * * * # Retouching A large number of Photoshop tools are used for retouching images or painting on them. These tools include the Magic Wand, Pen Tool, Heal Brush, Healing Brush, Clone Stamp, and the Spot Healing Brush. An important thing to remember about the various tools is that each has its own goal when used to correct an image. For instance, if you have an image with some yellow patches where the lighting is not even and there are some small spots that look like dents, a skin retoucher may use the Spot Healing Brush to fill these spots in with the correct skin tone. The retoucher can then use the Clone Stamp to remove the repair spot and also remove the dents. A retoucher may use the Magic Wand tool to click on the edge of the yellow part to select that area in the image, and then use the Direct Selection tool to click on the edges of the repair spot and click off (click the little circle that appears to turn it off). This will select the patch and all the surrounding pixels. Once that is selected, the Photoshopped patch will be deleted. * * *

What's New in the Adobe Photoshop Cs6 Text Fonts Free Download?

by Ben Wolfgang. Last week I introduced some of our new wheel and tire colors and a few of the new features that will be rolling out on our newly-refreshed site. In case you missed the "Preview Night" and weren't on Facebook, we had a pretty awesome turnout for our first soft-launch and — who would have thought — a pretty good turnout too. Our friends at the New York Times have been keeping an eye on the site, of course, but what they told us was that despite our many upgrades, their page still loads a bit slower than their own. Well, I don't know about you, but I think our site loads quite a bit faster than theirs. (And I'm not just saying that because I wrote the code. If you have your own recommendation for making pages load faster, please share it in the comments.) Anyway, you can expect a few more improvements in the coming days. In the meantime, I'll leave you with a small refresher on what our site looks like and what to expect. New Features As stated last week, we've been busy updating our list of wheels and tires. And we've added two new categories to better categorize the offerings: Categories This hasn't been done for a while and we're proud of it. Our categories are now organized by categories – of which there are 42, including: Need for Speed Low Sweeper Wheels for the Win …and a bunch more You'll be able to filter these by category in the sidebar. New Colors Our new list of wheels and tires have been given a visual refresh and include all of the colors that have been released to date, plus a handful of newly-added ones. Unfiltered List of Wheels and Tires At this point the site is populated with our list of wheels and tires, which can be filtered by size, price, wheel type, wheel technology, and more. Click here to view our list of wheels and tires. We'll be adding more filters and features in the coming weeks. Keep an eye out for some of these new features next week! If you have any questions, share them with us. And if you're in the market for a new set
