So I know that the buyer does not have to have LBS, but if you wanted to go somewhere else just ask. I have not gone anywhere else and will stay with this LBS. What they do is allow you to return your products and give you a full price or better than full price. They don't impose a use by date, and they are really slow to ship products. So slow that they only ship out one day a week. Thats a plus. But shipping is so slow that they only ship from October to May. You have to order by November to get shipped in time for the new year. So if you want to order for Christmas, order in October or November. Anywho, they will actually charge you a 50% restock fee if you return your product, and I think they do that until they ship. A Pilot Study of Training Managers to be Change Agents in Organizational Improvement. The purpose of this pilot study was to assess the feasibility and acceptability of training managers to be change agents. We hypothesized that the training would result in measurable improvements in perceptions of organizational quality and experience. We also explored whether the training would result in changes in the attitudes and behaviors of managers and the organizational culture. A pre-post training design was used. Thirty-six training participants from four different hospitals participated in the study. The mean age of the participants was 41.5 years (SD

My free software is typically available for only a single-format conversion, but.="ref"} Although blood culture of SCA individuals is more difficult than BCNA, because of the risk of overgrowth by the Gram-negative cocci, even in the neonatal period, we expect that the incidence of SCA in NBS can be increased by an appropriate treatment for BCNA. Third, early-onset neonatal sepsis has already been widely evaluated, and most cases could be detected within the first 3 days of life. In this study, we analyzed the incidence of NBS and BCNA by excluding the early-onset neonatal sepsis, which might have an impact on the results. Lastly, in this study, we did not clearly specify the criteria used to diagnose BCNA. In previous reports, microbial surveillance results were described as the first positive sample or the positive results after 5 or more consecutive negative samples.[27](#pd5568-bib-0027){ref-type="ref"} In this

study, we might not have been able to identify all BCNA. However, in this study, we compared all cases with the Japanese criteria reported in this study and previous studies. In conclusion, we showed that the total incidence of blood culture--positive sepsis, and SCA and BCNA was 1.8%, 1.9%, and 0.4% in the present Japanese neonatal population, respectively, by combining the criteria in our previous study[11](#pd5568-bib-0011){ref-type="ref"} and those in the present study.
