\* For more detail on working with layers in Photoshop, see the first part of the next chapter. \* Photoshop is a powerful graphics tool that can also be used to create and manipulate video and 3-D graphics, although it's not the best program for these applications. Photoshop Elements \* For more on the program itself, see the earlier section "Looking for a program? Get ready for a Photoshop shootout" \* You can use Elements to edit photographs, apply filters, crop, draw, create masks, create graphics, make annotated graphics, and edit video and audio. Using the Tools Photoshop has a lot of powerful tools and options. By default, Photoshop opens with a bunch of tool palettes at the bottom of the window. If you don't want to see these tool palettes — or need to be able to quickly access them — you can choose View⇒Customize Colors⇒Preferences to open a small window where you can choose which tool palettes to display, customize their size, and specify which tool palettes to display. In addition to the tools palette, a menu bar with the icon for each tool (as well as the selection tool) sits to the right of the image area. The tools at the top of the menu are powerful image-editing tools for creating special effects. The tools that are on the right side of the menu work with special tools and tools that enable you to transform the image. (See the upcoming section, "Transforming the Image.") The final icon on the left side of the menu is the Undo (or Undo History) tool. You can use this tool to undo any changes made to the image. (See the section "Undoing Changes with the Undo Tool," later in this chapter.) You can make selections with a selection tool at the top of the menu. Make a selection by clicking anywhere on the image and then pressing Enter (Return) to select a point and then clicking another point. If you want to select multiple items in one go, press Ctrl+A or click the Select or lasso tool and then click the items you want to select. The Selection tools are covered in detail in the next section. Photoshop also includes a Resize tool that enables you to crop the image, either horizontally or vertically, or both. Instead of using the cropping methods explained in the later sections in this chapter,

Elizabeth Joh Elizabeth Joh (née Culp; born 9 May 1979) is a British Labour Party politician and Member of Parliament (MP) for Leicester West from the 2019 general election. Early life and career Joh is the daughter of a veterinary surgeon and was educated at Lady Margaret School, Wakefield. She studied history at Bristol University, where she gained a Bachelor of Arts (BA) degree and completed a masters in public policy at Yale University. She worked as a research manager for the mental health charity Mind and as a speechwriter for the Labour Party. Member of Parliament Joh was elected as the Labour MP for Leicester West in the 2019 general election, succeeding the sitting Liberal Democrat MP, Tania Mathias. She had previously stood unsuccessfully for the Leicester East constituency in the 2015 general election and the Isle of Wight constituency in the 2017 election. Joh won the Leicester West Labour Party selection after a lengthy selection process, defeating chair of the local Labour Party Tessa Munt and local councillor Simon Nicholas. Joh beat out 27 other candidates in the Labour Party's only selection contest. In July 2019, Joh was one of nine female Labour MPs to join the all-female group, the NewFemale.
