## What's New In?

Portable Apps tracker is a handy utility that can satisfy your security needs and protect your system from any undesired activity, using the app blocker, file watcher and screenshot grabber to keep you informed about the state of your computer. The elegant user interface is very simple to use for anyone, while the functions and settings of the application are easily accessible and intuitive. This is the portable version of apps tracker, which does not require an installation and does not make any registry entries. Portable Apps tracker is portable and doesn't require any installation. Because of this Portable Apps tracker is secure, easy to use and fast. If you are concerned about what other users might be doing with your computer while you are away, Portable apps tracker can record every keystroke registered by the system and save the complete history in a convenient and easy-to-read list. This can also be used to monitor your own activity, in case you have to retrace your steps to find the solution to a certain issue. The application can also take screenshots of the desktop and capture the currently opened programs. This is obviously done without any alert or notification, so it does not disturb you while you work. The time interval between

---

the screenshots can be specified manually, depending on your needs. As well as using Portable Apps tracker for monitoring your own activity, you can also keep track of every application used on your computer and create in-depth statistics regarding the usage and average run time. The results are displayed as multicolored bar graphs for every separate day. In addition, you can receive all of this information in the form of email reports, thanks to the integrated email notification function. The report can contain summaries regarding the application usage, keystrokes, file changes and even captured screenshots. If you want to monitor your system or the performance of the Windows operating system, then Portable Apps tracker may be the tool you are looking for. What's new in this release: App blocks are protected and the application is able to send emails. It has many new features, so you will love the new version! Known issues: May not work well with programs that automatically close a window. Popular Software About PortableApps.com PortableApps.com is a website focused on portable applications. The website was created in 2015 and is run by the Portable Apps Society. In our opinion, portable applications
