Predicting predictors for detecting fall-risk predictors in older adults. To investigate the number of predictors to be assessed, the performance and the risk of overfitting of previously established regression models using falls as a dependent outcome in a sample of community-dwelling older adults. A cross-sectional study with monthly falls measurements over one year in a sample of 587 community-dwelling older persons with a mean age of 80.0 years. Only 2% of the subjects experienced one or more falls. Overfitting was assessed by two criteria: (a) the Goodness of Fit Index (GFI) and (b) the p-value of the significance tests for the regression. The GFI was less than 0.75 for both models. Both models explained 46% of the variance in falls. The p-value of the significance test for the 1-1 2-1-1 model was 0.011 and for the 1-2 1-2-1-1 model, 0.014. Previous studies that suggest overfitting are most likely related to over-fitting with cross-sectional design data.

This article is more than 1 year old This article is more than 1 year old Boris Johnson has accused Jeremy Corbyn of a “betrayal” of Labour voters as he opened his attack on the opposition leader ahead of the election. The Conservative prime minister spoke in an interview with the Observer in which he claimed the election would be a once-in-a-generation chance to get Brexit done and boost public spending to address public services issues. On Tuesday morning Corbyn launched a blistering attack on the Conservative election campaign, accusing the prime minister of pulling out of the hard-fought referendum and beginning an endgame to the Brexit talks in a “wholesale betrayal”. Among Labour’s election pledges is to write to all 20 million EU nationals living in the UK to inform them of the outcome of the EU referendum – something the government has yet to fulfil. “He’s offering voters a make-or-break choice as we face the most important decision in our nation’s history – leaving the EU or sticking with it,” Corbyn told the Observer. “He has got it wrong. He is making a concession to leave voters who were promised a hard Brexit and who, after he broke the promise, now want him to deliver the most extreme form of it. “It is a huge betrayal and the public will see through it.” Corbyn’s campaign has been dogged by the challenge of how to re-engage young voters who backed leave in the referendum and who may not have voted in previous elections. A survey published on Tuesday showed the Labour leader was almost two-to-one likely to vote, but as likely to vote for the Tories as Labour on the same level. Johnson, who is campaigning to become the next Conservative prime minister, said he was working to get the “best possible Brexit deal for Britain” and wanted a “strong and stable government” in Downing Street to get on with it. “If Jeremy Corbyn is prime minister, we face being locked in a customs union that means our economy cannot take advantage of the opportunities of a good trade deal,” he told the Observer. The prime minister accused Corbyn of “unacceptable anti-Semitism” and “exploiting people’s divisions”. He added: “Labour has a long way to go
