BlaSON

The purpose of BlaSON is to allow text entry in a new, easy-to-use environment and also to allow you to save documents in RTF format. Unlike word processors, this application focuses only on the text content and provides a visual scrollbar to allow users to view the entire body of the document without having to scroll back and forth.

Languages and Languages:English Editing Features:
Supports Unicode (UTF-8), as well as ISO 8859-1, the traditional American Microsoft codepage (e.g. CP437, CP850,...), and others. Converters:Unicode (UTF-8):Converts to or from Unicode (UTF-8). Unicode Everywhere:Enables conversion between different character encodings (e.g. ISO 8859-1, UTF-8,...). Single Line Support:Enables conversion between different line-endings. Line-Ending Support:Unicode-aware line-ending detections. Copy and Paste:Copies from and pastes into Windows. Find and Replace:Find and Replace all matching strings. Import/Export:Import/export to Text, RTF, HTML, and other formats. Converting:Converts a Unicode text in a word processor format in ASCII or Windows (ANSI) format. Shrinking:Shrinks the body of the file. Saving:Saves the file to memory. Largest Content Width:Maximum number of characters per line is set to the largest number of characters of the column width (480 for Windows 7). Smallest Content Width:Maximum number of characters per line is set to the smallest number of characters of the column width (60 for Windows 7). Saving:Saves the file to memory. Custom Ranges:You can select a range of text to be saved. Ranges with Formatting and Punctuation:Allows

you to save text with formatting or including special characters like quotes, semicolons, brackets, etc. Indent/De-indent: You can indent or de-indent text by using up and down arrow keys. Indent: Instantiates number in the text by the length of the current line. Current Line: Allows you to save the current line. Current Line with Formatting: Allows you to save the current line with formatting. Discard Characters: The current line is
